As firefighters and fire officers we oftentimes view the problems we face day-to-day as local or unique, but the reality is that most of the problems we face in the fire service are shared by firefighters throughout the nation (volunteer, paid, urban, suburban and rural). This high impact, high-energy program will highlight the challenges being faced by firefighters and fire officers throughout the nation while sharing critical insight as to the opportunities these challenges bring to current and future leaders of the fire service. This program is a no holds barred presentation designed to uphold the mission of our profession while challenging our daily routines and the decisions that accompany them.
